

ABSTRACT OF THE DISCLOSURE

The invention relates to a closure and a method for connecting and opening saw cables (1), whereby the closure (4) is made up of several parts, which may be connected to each other, such as to rotate about at least two separate axes, by means of several bearings (13, 26, 27). The
5 closure comprises two closure pieces (5, 6) with a separable rotating bearing (13) and a bearing lock (18) which may be opened, depending on the angular position of the closure pieces.
